

Assignment for Monday, March 27

Before class, do the following:

1. Do Computing Assignment 8. Note that I gave everyone 100% on Computing Assignment 7—I didn't want you to have work over Spring Break. Computing Assignment 8 is due on eCampus before class on Monday.
2. Continue to study for Exam 2 on Wednesday, March 29. I've posted a study guide, but I will continue to update it. Please come to the review with question. I plan to work through most of the calculations that we need for the exam (listed at the top of the study guide) and then address specific questions.
