

Assignment for Friday, April 28

Before class, do the following:

1. Read ch. 26 up to Section 6 titled “The t -Test” (pp. 475-488) of FPP. This elaborates on the material we covered in class on Wednesday in important ways (i.e., z -statistic for an average), so don’t skip the reading. Complete the following exercises:
 - Set A, pp. 476-477: 5, 5
 - Set B, p. 478: 1-5
 - Set C, pp. 481-482: 1-5
 - Set D, pp. 482-483: 1-3, 5
 - Set E, pp. 486-488: 1-5, 7
2. If there are any exercises that you have questions about (especially, but not limited to, the Review Exercises for which there are no solutions), then please add them to the “exercises to discuss” document linked to on the course webpage under April 19.
3. Submit the final version of Writing Assignment 2 before class. Do not forget to include a detailed response memo that explains your reviewers’ comments and your changes (appended to the end of the paper—in the same Word document). If appropriate, include comments from your consultant at the writing center.
